Introductory Remarks.

Wellcome
Library

MESSRS. MALLAN wish it to be understood that the Mineral Teeth supplied by them, which gained the Prizes at the London, Paris, and Vienna Exhibitions, can be adapted to the mouth without the least pain, set upon *Gold, Platinum, Dental Alloy, Thionite, Vulcanite, Coralite, Elastic Gum*, and all other bases recognised by eminent Dentists as being fit materials to be used in the fixing of Artificial Teeth; at the same time in each particular case, they adopt that base which is most suitable to the mouth, at the lowest charge compatible with good workmanship and the best and purest materials.

One of the numerous advantages which the public receive by the adaptation of Artificial Teeth upon the Mallantine system of Painless Dentistry (unobtainable except at Messrs. Mallan's Establishments) is the important fact that, at a trifling cost, upon the loss of the patient's natural teeth, artificial ones can be added to the existing frame, thereby preventing the outlay for a new set, as it often occurs when teeth are adjusted by other dentists.

MESSRS. MALLAN, since they have made the **best English and American Work** at moderate and inclusive prices—to suit the requirements of all—have taken the lead in supplying Artificial Teeth, and have supplied over

!!!

**Half-a-Million
Sets of Teeth,
and satisfied
Half-a-Million Persons.**

!!!

A record which is without parallel in the World. This is the **Best Possible Testimonial** and proves their **Superiority** over other Systems.

COMPLETE SET OF TEETH ONE GUINEA.

How can it be done?

Because Messrs. Mallan *are the largest purchasers and manufacturers of materials in the world.*

Because Messrs. Mallan *buy all materials used in the manufacture of Artificial Teeth for Cash.*

Because Messrs. Mallan *conduct their practice upon cash principles, and make no bad debts.*

Because Messrs. Mallan *are satisfied with a small profit upon each set of teeth, owing to the large number they supply.*

Because Messrs. Mallan *pay good wages to their employees, therefore there is no dissatisfaction, and the public reap the benefit of good work.*

Because Messrs. Mallan *employ more capital and labour than any other Dentist or Dental firm in the world.*

Because Messrs. Mallan *move with the times, and buy every new invention of any value that may be introduced in England and America.*

No dentist can do more for the patient than Messrs. Mallan. They are humane, attentive, and considerate, whilst their moderate charges recommend them to all classes.—Copied from *Medical Record*.

American Crown, Bridge, Bar Work, and Gold Fillings.

Those patients desirous of having this American invention, cannot do better than consult us on the subject, as we have at the present time gentlemen who have devoted many years of close study in the American Colleges for the purpose of perfecting themselves in all grades of Artistic American Dentistry, and are enabled to give the public many more advantages than can be obtained at any other establishment in England, and at greatly reduced charges.

Among the staff of assistants are specialists in all legitimate American processes for restoring decayed teeth, such as gold fillings, "contour" work, and adaption of gold and porcelain crowns on healthy stumps. These processes will be found often particularly valuable, as they restore to serviceability otherwise useless teeth, and may avoid the necessity of an artificial palate. Owing to the extent of our practice, we claim that this class of work can be obtained at our establishments at prices far below that which the ordinary dentist can afford to work for.

Messrs. Mallan are able at all times to execute orders with the greatest despatch, a great advantage to persons visiting London and pressed for time; the manufactories and appliances being situated at each Branch they can alter and repair Artificial Teeth made by other Dentists while the person waits.

A set of Teeth can be made and fitted in a few hours, if required. Persons having Teeth made by other dentists, will do well to consult Messrs. Mallan, as in many cases at a trifling cost they may be re-modelled to their system.

Messrs. Mallan also supply the Patent Prize Medal Self-fastening Teeth for aged persons, which are fitted with flexible soft gums, and may be worn with the greatest ease and comfort in the most tender mouths, obviating all bulky substances, large plates and springs—pronounced to be the greatest boon to nervous sufferers ever introduced, restoring mastication and improving articulation in a few hours.

Mr. V. C. Mallan (of the firm of Messrs. Mallan) is in attendance as usual at **106**, Edgware Road, and one of the principals of the firm attends at the other establishments, as described on outside cover.

A few of the Benefits derived from consulting Messrs. MALLAN, the Surgeon Dentists, (who are always pleased to give advice free), actual makers of the mineral and self-adhesive Teeth, held in such high esteem by those to whom they have been supplied.

1.—MESSRS. MALLAN, having been in the profession for over 30 years, and gained great experience from the variety of cases they have attended, patients may rely on the Best Workmanship and most suitable materials, thus ensuring their complete satisfaction.

2.—The best of workmanship at the lowest possible charges.

3.—Artificial Teeth fitted without pain. Their patent system renders the extraction of stumps unnecessary, and prevents an operation both unpleasant and painful to the patient.

4.—The Artificial Teeth being specially manufactured by them, can be worn without the slightest inconvenience, with this advantage that on the loss of one's own Teeth

artificial ones can be added, thus preventing the expense of a new set.

5.—The adaptation of their superior enamelled mineral Teeth counteract any irregularities of the face, and restores youth to the features.

6.—The Artificial Teeth fitted by MESSRS. MALLAN ensure perfect articulation and mastication, a real boon to public speakers and sufferers from indigestion.

7.—Patients supplied with Teeth fitted upon this patent system, enjoy a double advantage—the Teeth do not require springs or wires, being fitted by atmospheric pressure they adhere so closely to the gums as to render detection by the keenest observer impossible, and they can only be removed at the will of the wearer.

8.—Charges within the reach of all ; finest materials ; best workmanship ; entire absence of pain and discomfort ; and Teeth that perform to perfection the duties of natural ones ; these are a few of the advantages ensured by a visit to MESSRS. MALLAN.

THE REASON WHY.

People often wonder why they suffer with Head-ache, Lowness of Spirits, Wind, Sleeplessness, Pains in the Back, and a thousand other ailments. They apply to doctors and take medicines without deriving any benefit. In a few words these complaints in nine cases out of ten arise from defective mastication, causing indigestion.

Messrs. Mallan have proved this fact times out of number. Now, reader, does it not stand to reason that a good set of Teeth must assist Mastication and Digestion, and when we consider the small cost incurred in procuring the same, no one need wonder that Doctors recommend their patients to consult a Dentist, especially when the most nervous can rely upon a Single Tooth to a complete Set being fitted without pain, the Extraction of Stumps not being required.

The following facts are copied from the *London Daily Telegraph* :—

SUDDEN DEATH OF A PHYSICIAN.—Mr. William Jelly, Fellow of the Royal College of Physicians, and lately residing at 105, St. Clare Road, West Kensington, went out on Wednesday night to attend a meeting at Exeter Hall. When passing under the portico of the Haymarket Theatre he was seen to stagger and fall down dead. At the inquest, which was held yesterday by Mr. Troutbeck, at the St. Martin's Vestry Hall, a doctor who had made a post-mortem examination said that the deceased suffered from heart disease. The stomach was full of undigested food. Deceased had only three teeth, and was unable to masticate; and the undigested food had pressed upon the heart. Artificial teeth "might have saved his life." The jury returned a verdict of death from heart disease.

COPY OF GUARANTEE

GIVEN WITH ALL TEETH SUPPLIED.

London,

.....189...

Case No.....

I hereby guarantee that the Teeth supplied to M..... are composed of chemically pure materials, will not corrode in the mouth, and never change color or decay. Should any breakage occur, I further promise and agree to make good the same, free of charge.

V. C. MALLAN.

MESSRS. MALLAN take this opportunity of informing the public that all artificial teeth supplied receive their personal attention and supervision before they are allowed to be placed in the mouth, therefore patients can rely upon receiving the full benefits of all the latest improvements in the new system of Painless Dentistry.
